Wear&care product, people, planet

SOLO Group

1. Healthy and safe production sites

ACCORD has been working in Bangladesh since 2013 to build a safe and healthy clothing and textile industry for all its workers. This is possible through active collaboration between brands, unions and factories. SOLO Group joined ACCORD in 2020.

2. Decent working conditions

Fair Wear's mission is to help workers assert their rights to safe, dignified and well-paid work. SOLO Group has been a member of the FAIR WEAR Foundation since 2014 and was awarded the "Leader" status in 2021.

3. Positive management of our employees

Since its foundation, SOLO Group has implemented equal profit-sharing among employees. SOLO Group has 200 employees worldwide (France, Spain, Italy, Bangladesh and China). All employees are guided by a team spirit of solidarity and by managers who encourage commitment, involvement and internal development.

1. Environmental requirements for the selection of our partners

SOLO Group only works with partners who meet the environmental requirements of its internal code of conduct.

2. For a lasting change of the industry players

SOLO Group teams are very much involved locally and work as closely as possible with factories to seek out, support and encourage new, more virtuous production methods.

3. Towards sustainable logistics

We largely favour sea freight, reuse cardboard boxes, develop recyclable or recycled packaging, optimise our warehouse energy consumption: at SOLO Group we are committed to energy-efficient logistics on a daily basis.

wear&care

1. Sustainability

A timeless style to ensure that garments are perennially fashionable and therefore are worn for a long time. Products designed to last for years. A real policy of stock continuity.

2. Quality

An in-house team dedicated to quality and R&D. All our products are checked before being shipped.

3. Sustainable development

New models are eco-designed to reduce their carbon footprint. We largely favour recycled materials and organic cotton.
